

CASE STUDY

# Battery Energy Storage System Project, Australia

RENEWABLE ENERGY

[tglobal.com](https://tglobal.com)

# facts & figures

## CLIENT

An Australian EPC contractor

## LOCATION

EXW Qinzhou, China to a remote site in Marblebar, Australia via Port Hedland

## PROJECT PERIOD

2023 - 2025

## TOTAL CARGO WEIGHT / VOLUME

a total of almost 2,100 mt

## SCOPE OF WORK

TGP's scope of work included pick-up at manufacturer, breakbulk ocean transport, port handling, and a challenging final leg: 90 km of dirt road completed in just three hours.

Over two years of consultation secured port approval under new IMO dangerous goods regulations.

From high-pressure cleaning and customs clearance to specialized equipment for safe handling, every step was executed under EXW terms to ensure precision and safety.
