

CASE STUDY

Jetty Construction Project, Antarctica

CONSTRUCTION & INFRASTRUCTURE

facts & figures

CLIENT

An American Engineering and Construction Consultancy

LOCATION

Stockton, CA, USA via Punta Arenas, Chile to Palmer Station, Antarctica

PROJECT PERIOD

2023 & 2021

TOTAL CARGO WEIGHT / VOLUME

2,180 mt & voyage

SCOPE OF WORK

TGP was contracted to perform the Palmer Station Commercial Re-Supply Project (2023), which included a full-charter ice-class, Polar-coded vessel to transport fuel, provisions, gravel and personnel to the research station and a return voyage. TGP also delivered the Palmer Station Pier Replacement Project (PALPIER), which included the purchase, bagging, biosecurity and transport of 2,180 mt of gravel.

One of the world's remotest construction sites, TGP were required to ensure a seamless and flawless delivery under extreme conditions.
