

CASE STUDY

# Power Station Project, Northern Ireland, UK

POWER GENERATION & TRANSMISSION

[tglobal.com](https://tglobal.com)

# facts & figures

## CLIENT

A major electrical engineering contractor

## LOCATION

EU and North American origins to Belfast, Northern Ireland

## PROJECT PERIOD

2022 – 2022

## TOTAL CARGO WEIGHT / VOLUME

17,000 cbm

## SCOPE OF WORK

DDP deliveries ex various origins inside EU and North America to a Power Plant via Belfast, Northern Ireland. Project consisted of 4 x heavy lifts up to 400 mt each and 4 x vessel charters within a period of 6 months. The transport included several bridge assessments and modifications.

It was the first time a convoy execution has been carried out in Northern Ireland. The generators were the heaviest items ever transported overland in Northern Ireland, which required considerable advance planning, liaison with local authorities and route planning by TGP's experienced team over the course of several months.
