

Trans Global Projects Opens New Office in Belo Horizonte, Brazil

Belo Horizonte, Brazil, 11 November 2025: *TGP announces the opening of its new office in Belo Horizonte, expanding its operational footprint in Brazil. This development strengthens the company's presence in the southeastern and central regions, with a particular focus on Minas Gerais — one of the country's most significant industrial and mining centers.*

The Belo Horizonte branch is fully operational, supporting both operations and commercial activities. The office is positioned to provide clients with direct, responsive service and enhanced logistical coordination. This step reflects TGP's ongoing commitment to proximity, reliability, and service excellence.

"Establishing a presence in Belo Horizonte is a natural progression in TGP's growth strategy," says Renato Mello, Managing Director Central & South America, TGP. "It enables us to work more closely with our clients, improving response times and operational oversight while maintaining the high standards they expect."

The office is led by Regional Manager Aliny Delfino, a logistics professional with more than 15 years of experience and deep familiarity with the Minas Gerais market.

"Being in Belo Horizonte allows us to be present and accessible," adds Aliny Delfino, Regional Manager, TGP. "We are here to support our clients with the technical expertise and regional insight that define TGP's approach."

TGP continues to expand its operations in Brazil, delivering logistics solutions for complex, large-scale projects across mining, oil and gas, energy, pulp and paper, and infrastructure sectors. A recent example includes an energy project, where TGP managed the full logistics chain — from port to site — including heavy-lift cargo, oversized components, and multimodal transport in remote and challenging environments.

With the opening of the Belo Horizonte office, TGP now operates three offices across Brazil. The São Paulo office serves as a commercial and operational hub in the country's financial capital. The Rio de Janeiro office supports key energy and infrastructure projects in the coastal region. The new Belo Horizonte office is strategically located to serve the industrial and mining heartland of Minas Gerais.
